RECORDABLE

RING TONE IS HERE

Panasonic

GD92

A MOBILE RINGS.

EVERYONE REACHES FOR THEIR'S.

NOT YOU THOUGH.

BECAUSE YOU'VE RECORDED YOUR

OWN, INDIVIDUAL RING TONE

ON YOUR PANASONIC GD92.

UNIQUE TO THE GD92,

THE RECORDABLE RINGER WILL

RECORD ANY SOUND

AS A DISTINCTIVE RING TONE.

RECORDABLE RINGER & CUSTOMISED RING TONE

A mobile rings. Everyone reaches for theirs'. Not you though. Because you've recorded your own, individual customised ring tone on your GD92.

Using the recordable ringer feature, the GD92 is able to record any sound, noise, song or phrase to be used as a very unique ring tone. Your bird singing, the revving of a sports car or even the voice of your child - the possibilities are endless.

The GD92 also allows you to customise your own ring tone, using the keypad of the phone as a keyboard.

MOBILE EMAIL

So you're rarely at home, either at work or at play. Still you can access and reply to those emails using your existing email address. Fast and Simple.

The Panasonic GD92 gives you access to POP3 e-mail accounts with remote server access. Send, receive, create or reply - the GD92 offers total freedom of mobility.

FOUR BACKLIGHT COLOURS & CALL ALERT PROFILES

There are some calls you'll want to answer. Others you won't. And even if you are somewhere dark and noisy, the GD92's choice of backlight colour and Call Alert Profiles will help you tell one from the other.

Allocate a specific backlight colour, group name, ring tone or caller icon to selected names in your phonebook and you can quickly and discreetly identify incoming calls.

TEGIC T9® PREDICTIVE TEXT INPUT

Ever wished you could type faster? Don't worry. The GD92 helps you get text messages and emails right, first time. One key press per letter. The GD92 is so intuitive, it knows what you are typing and intelligently offers you a selection of words to choose from. This technology really hits the button. So you don't have to so often.

DICTIONARY & VOICE MEMO

You don't have a notepad but you need to remember something important - a phone number or address, the shopping list, or even your wedding anniversary! The GD92 is capable of recording two Dictaphone messages of 10 seconds duration. Or, when in a phone conversation, the GD92 can record two Voice Memo's of 18 seconds duration. You'll never forget the milk again.

DESKTOP HANDSFREE

You are sitting over a glass of wine. You talk. You listen. So can all your colleagues, but not half the café. The GD92 is a real socialite.

Desktop Handsfree allows a group of people to participate in a conversation. A high fidelity loudspeaker at the rear of the GD92 ensures audible volume and quality sound. Calls can easily be switched between handsfree and hand held modes during a call to ensure privacy when required.

CALCULATOR & CURRENCY CONVERTER

Never struggle with mathematics of the mind again. Use your GD92 and be sure the answer is correct. The GD92 offers a calculator and a currency converter to make calculations simple.

100 PHONEBOOK MEMORIES

The GD92 offers you the flexibility to store your favourite names and phone numbers on either the handset or on the SIM card.

VIBRATION ALERT

Built-in Vibration Alert will silently alert you to incoming calls with a discreet vibration, rather than a loud, imposing ring tone. This feature is ideal for silent or noisy environments, ensuring you stay in touch no matter where you are.

ALARM, POWER ON/OFF

The GD92 features an alarm that can be programmed to sound once only, or at the same time each day. The GD92 can also be set to power on or off at a designated time - ideal for those who don't like to be contacted out of business hours.

COMPACT SIZE & APPEARANCE

The GD92 is a miniature mobile phone, weighing a meagre 77g. Extremely small, slim and lightweight, the GD92 is available in a choice of stylish colours - Silver, Blue or Titanium, and features a large six line display screen that is exceptionally easy to read.

PREDEFINED SMS MESSAGES

The GD92 gives you easy access to SMS (Short Message Service) with a selection of the most useful pre-programmed short text messages. Plus Panasonic's unique user interface provides you with direct access to the recipients phone number, meaning messages can be sent in seconds and with minimum keystrokes.
